Information Notice

Subject: Mandatory Entry of APIS Data in PNRs for Travel To and From the Russian Federation

As part of the regulatory requirements imposed by the authorities of the Russian Federation, the transmission of APIS (Advance Passenger Information System) data is mandatory for all passengers traveling to or departing from Russian territory.

Accordingly, all our Travel Agency Partners are requested to strictly comply with the following provisions:

- ✓ APIS information must be entered at the time of PNR creation and before ticket issuance, in full compliance with the details appearing on the passenger's travel document.
- ✓ APIS data must under no circumstances be associated with a flight segment. When entering the information, all segments must be unchecked in the "Sector Association" section before validation in Graphical Mode, and no segment should be specified in Cryptic Mode.

Failure to comply with these requirements may result in the rejection of the data by the competent authorities and may create operational difficulties in the processing of the passenger's booking.

The screenshots attached to this notice provide detailed instructions on the correct procedure for entering APIS data in both Graphical and Cryptic Modes.

Particular attention is requested regarding the strict application of this notice.

Please accept, dear partners, the assurance of our highest consideration, and we thank you for your cooperation.
